

Blushield devices emit natural frequencies. The frequencies and waveform of Blushield products are developed in such a way that these are in harmony with the body. Not just Schumann or Solfeggio frequencies because that does not work in the long term. A dripping tap effect can occur.

Blushield frequencies follow the body's natural rhythms and cycles. Besides the right frequencies the use of intervals is what makes Blushield unique. The intervals are determined by using phi ratio; a mathematical formula that also appears in nature. The right frequencies in combination with the intervals enable the body to stay balanced.

Blushield products also work well for animals and plants. This excludes psychosomatic factors or placebo effects.

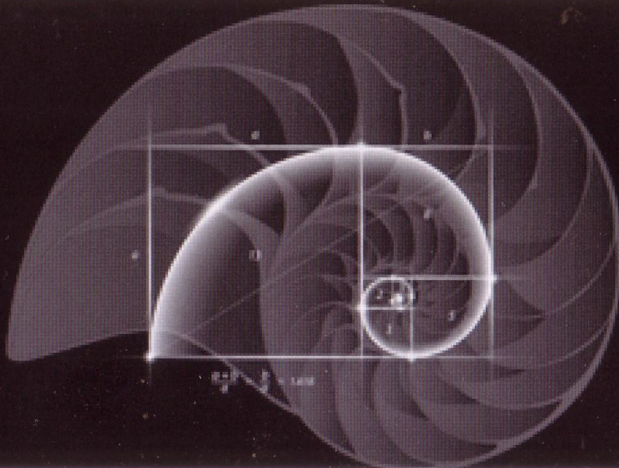

For the transmission of the frequencies microprocessor technology is used. This is effective, uses very little power and there is no electrosmog emitted by the equipment.

"If you want to find the secrets of the Universe, think in terms of energy, frequency and vibration"

Nikola Tesla (Physicist 1856- 1943)

Phi Ratio

What are potential health problems caused by electromagnetic radiation (EMF)?

Neurological: sleeping disorders, fatigue, depression, concentration disorders, nervousness, ...

Cardiologic: heart palpitations, high blood pressure, heart rhythm disorders, ...

Ears/eyes: ringing in your ears (tinnitus), sensation of pressure, vision deterioration, cataract, eye strain ...

Fertility: reduced fertility, miscarriages and birth defects.

Hormonal: disrupted production of melatonin, serotonin and other hormones.

Other: skin problems, muscle and joint pain, ...

Therapy resistance: people who are effected by EMF's often react badly on therapies.

EMF radiation is caused by all kinds of appliances. In particular the radiation from wireless devices and cell towers is a problem for a growing group of people. It is therefore important to limit exposure as much as possible.

CELL TOWERS

MOBILE PHONE

WIFI

COMPUTER

LAMPS

TELEVISION

POWER LINES

ELECTRICAL APPLIANCES

SMART METERS

What can I do myself?

Information: find information or let someone inform you. Below you will find a small selection of possible measures.

Wiring: avoid wireless technology and choose for wired as much as possible. A wired computer or laptop and a wired telephone are the safest options. If you have a Wifi router or Dect phone choose for a low radiation model or turn it off at night at night.

Smart meter: if possible refuse the smart meter and do not use a smart thermostat.

Sleeping: Do not sleep with your mobile phone switched on. If you must have it on make sure it is as far away from your bed as possible. Keep distance from wiring and appliances.

Blushield products: because exposure to EMF is not always avoidable, we advise to use Blushield products. There are Blushield products for your home, work, school and for travelling.
